

## GUS ENGELING WILDLIFE MANAGEMENT AREA

### Feral Hog E-Postcard

#### BACKGROUND

The Gus Engeling Wildlife Management Area (GEWMA) is located in northwest Anderson County, 22 miles northwest of Palestine. This 11,079 acre area was purchased from 1950 to 1960 under the Pittman-Robertson Act using Federal Aid in Wildlife Restoration funding. The terrain is flat to gently rolling post oak woodlands, consisting of dense stands of oak-hickory overstory with associated understory species such as yaupon, greenbriar, dogwood, hawthorn, elm, and huckleberry. The GEWMA primary purpose is to function as a wildlife research and demonstration area for the Post Oak Savannah Ecoregion. Sound wildlife management tools that include prescribed burning, grazing, brush control, and hunting are used to demonstrate habitat management to resources managers, landowners, and other interested groups or individuals.
